---

EARNED DEGREES

Ph.D.,	Electrical and Computer Engineering	Rice University	May 2007
M.S.,	Electrical Engineering	Rice University	May 2002
B.S.E.,	Computer Engineering (magna cum laude)	University of Michigan — Ann Arbor	April 2000
B.F.A.,	Performing Arts Technology — Music	University of Michigan — Ann Arbor	April 2000

PROFESSIONAL APPOINTMENTS

Julian T. Hightower Chair	Georgia Institute of Technology	2022–present
Professor	Georgia Institute of Technology, School of ECE	2018–present
Adjunct Faculty	Georgia Institute of Technology, Interactive Computing	2015–present
Graduate Program Faculty	Georgia Institute of Technology, BME	2009–present
Associate Professor	Georgia Institute of Technology, School of ECE	2014–2018
Demetrius T. Paris Jr. Professor	Georgia Institute of Technology, School of ECE	2013–2014
Assistant Professor	Georgia Institute of Technology, School of ECE	2008–2014
Postdoctoral Scholar	University of California, Berkeley, School of Optometry	2007–2008
Research Assistant	MIT Lincoln Laboratory	2002
Research Assistant	University of Michigan, School of Music & EECS Dept.	1997–1999

ADVISORY AND BOARD POSITIONS

Advisory Board Member	Motif Neurotech, Inc.	2023–present
Advisory Board Member	Institute of Neuroethics	2021–present
Board of Directors Member	Neuromatch, Inc. (co-founder)	2020–present
Board of Directors Chair	Neuromatch Conference, LLC (co-founder)	2020–2023
Core Team Member	IEEE Brain Initiative	2017–present
Executive Council Member	Emory Neuromodulation and Innovation Center (ENTICe)	2014–2020

HONORS AND AWARDS

International or National Recognition

The Neuro – Irv and Helga Cooper Foundation Open Science International Prize (Neuromatch, Inc.)	2022
James S. McDonnell Foundation 21st Century Science Initiative Award (6 international recipients)	2014
NSF CAREER Award	2014

Elevated to Senior Member of the Institute of Electrical and Electronics Engineers	2012
Faculty of 1000 Biology (now F1000Prime) recognition for article (Rozell et al. 2008)	2010
Elected Member of Tau Beta Pi	1998
Elected Member of Eta Kappa Nu	1996

Institute Research and Leadership Recognition

Diversity and Inclusion Fellowship	2020
Provost's Emerging Leaders Program	2018
Outstanding Junior Faculty Member Award (School of ECE, Georgia Tech)	2017
Sigma Xi Young Faculty Research Award (Georgia Tech)	2014
Demetrius T. Paris Junior Professorship	2013
Texas Instruments Distinguished Graduate Fellowship (Rice University)	2000–2007
Nettie S. Autrey Memorial Fellowship (Rice University)	2004

Institute Education and Service Recognition

Student Recognition of Excellence in Teaching: Honor Roll	S2021,F2021,S2023
Student Recognition of Excellence in Teaching: Class of 1934 Award	2020
ECE Outreach Award	2020
Class of 1940 W. Howard Ector Outstanding Teacher Award (Georgia Tech highest teaching award)	2019
CETL Class of 1940 Course Survey Teaching Effectiveness Award	2013
CETL/BP Junior Faculty Teaching Excellence Award	2013
CETL "Thank a Teacher" certificate (8 semesters)	2008–2020
Llangollen Award for leadership and dedication (U. of Michigan, Men's Glee Club)	2000
EECS Department Outstanding Student Instructor Award (U. of Michigan)	1998

RESEARCH SUPPORT

Lincoln Lab.	Conduct Machine Learning Research on Multi-modal Learning Using Contrastive Learning	2022–2023
Dana Found.	Proposal for Georgia Tech/IoNx Center for Neuroscience and Society	2022–2023
NINDS (UC2)	Grassroots Rigor: making rigorous research practices accessible, meaningful, and building a community around them	2022–2027
NSF	2022 Collaborative Research in Computational Neuroscience (CRCNS) Principal Investigators Meeting (PI)	2022–2023
NSF	Learning, refining, and understanding models through relational feedback (co-PI)	2021–2025
NINDS (R01)	CRCNS: Closed-loop computational neuroscience for causally dissecting circuits (PI)	2019–2024
NIBIB (T32)	Training in Computational Neural Engineering (co-I)	2019–2024

DARPA	Active Similarity Learning and Manifold Graphs for Learning with Few Labels (co-PI)	2019–2022
NINDS (UH3)	Electrophysiological Biomarkers to Optimize DBS for Depression (co-PI)	2018–2023
JSMF	Scholar Award in Studying Complex Systems: Tracking time-varying low-dimensional structure to uncover the building blocks of complex dynamics (PI)	2015–2021
ONR	Moving Towards Zero-Shot Learning via Analogy and Imagination (PI)	2015–2020
NSF	CAREER: Exploiting Low-Dimensional Structure in Data for More Effective, Efficient and Interactive Machine Intelligence (PI)	2014–2020
NSF	BD Spokes: SPOKE: SOUTH: Large-scale Medical Informatics for Patient Care Coordination and Engagement (co-PI)	2016–2019
GT/NEC	Closed-Loop Optogenetic Control of Single Neurons In Vivo (PI)	2016-2017
ONR	Perpetual Systems Based on Cortical Computation (co-PI)	2015–2016
TI	Sparse Sampling of Multi-Modal Physiological Data (PI)	2015–2016
NSF	CIF:Medium:Collaborative Research: Tracking Low-Dimensional Information in Data Streams and Dynamical Systems (PI)	2014–2019
NEI (R01)	Neural Population Coding of Dynamic Natural Scenes (co-PI)	2009–2015
NSF	CIF:Medium: Analog Architectures for Optimization in Signal Processing (PI)	2009–2014
NGA	Compressive Sensing Design of LIDAR sensors (PI)	2009–2013
NGA	Unsupervised Learning of Hierarchical Structure in Multi-Band Imagery (co-PI)	2008–2015
NSF	Collaborative Research: Leveraging Low-Dimensional Structure for Time Series Analysis and Prediction (PI)	2008–2013

PROFESSIONAL ACTIVITIES

Associate Editor:	*IEEE Open Journal of Signal Processing* (inaugural ed. board)	2019–2022
	Neurons, Behavior, Data analysis, and Theory (inaugural ed. board)	2018–present
	IEEE Transactions on Molecular, Biological and Multi-scale Communications (inaugural ed. board)	2015–2018
Program Committee:	*Neural Information Processing Systems (NeurIPS)*	2020
	Signal Processing with Adaptive Sparse Structured Representations (SPARS)	2019
	International Conference on Machine Learning (ICML)	2016
	IEEE Global Conference on Signal and Information Processing (GlobalSIP) symposium on *Information Processing for Big Data*	2014
	IEEE Global Conference on Signal and Information Processing (GlobalSIP) symposium on *New Sensing and Statistical Inference Methods*	2013
	IEEE Statistical Signal Processing Workshop	2012
Organizer:	*Neuromatch 4.0*	2021
	Co-organized with D. Goodman, K. Kording, B. Wyble, T. Achakulvisut, B. Brunton, J. Bizley, A. Urai, Y. Poirazi and M. Peters	

	Neuromatch 3.0	2020
	Co-organized with D. Goodman, K. Kording, B. Wyble, T. Achakulvisut, T. Vogels, Y. Poirazi and M. Peters	
	Neuromatch 2.0: An Unconference in Computational Neuroscience	2020
	Co-organized with D. Goodman, K. Kording, B. Wyble, T. Achakulvisut, T. Vogels, Y. Poirazi and G. Lindsay; Sponsorship from IEEE Brain	
	Intelligent Interactions with the Brain (I^2B) Workshop, Neural Engineering Center, Georgia Institute of Technology	2019
	Co-organized with G. Stanley and L. Ting	
	IEEE International Workshop on Computational Advances in Multi-Sensor Adaptive Processing (CAMSAP) special session on *Principles of Dynamics and Control in Machine Learning*	2019
	Co-organized with M. Davenport, J. Haupt and M. Wakin	
	Computational and Systems Neuroscience (Cosyne) workshop on *Closed-loop control of neural systems and circuits for scientific discovery*	2018
	Sponsorship from NIH BRAIN Initiative and IEEE Brain	
	Co-organized with G. Stanley	
	IEEE International Workshop on Computational Advances in Multi-Sensor Adaptive Processing (CAMSAP) special session on *Low-dimensional Dynamical Systems in Signal Processing and Data Analysis*	2017
	Co-organized with A. Charles, M. Davenport, J. Romberg and M. Wakin	
	Asilomar Conference on Signals, Systems & Computers invited session on *Extracting information from electrophysiology data*	2013
	IEEE Conference on Decision and Control invited session on *Exploiting Sparsity and Compressive Sensing in System Identification*	2010
	Co-organized with M. Wakin and T. Vincent	
Core Creative Team:	"Step the Brain Along a Path": GTArts dance commission inspired by neuroscience, neurotechnology and neuroethics	2020–2022
Member:	Institute of Electrical and Electronics Engineers (S'00-M'09-SM'12)	
	American Association for the Advancement of Science	
	Society for Neuroscience	
	International Neuroethics Society	

TEACHING EXPERIENCE AND OTHER ACTIVITIES

Instructor:	Introduction to Signal Processing – recitations (ECE 2025)
	Introduction to Signal Processing – lecture (ECE 2025)
	Introduction to Digital Signal Processing – recitations (ECE 2026)
	Introduction to Probability and Statistics for ECE (ECE 3077)

	Signals and Systems (ECE 3084)	
	Information Processing Models of Neural Systems (ECE/BME 6790)	
	Signal Detection and Estimation (ECE 7251)	
	Are You Thinking of Becoming an Academic? (ECE8801/ME8801/ISYE8811/ChBE8801)	
	Future Faculty Practicum (ECE8801)	
Activities:	Co-developed new course "Future Faculty Practicum"	2020
	Co-developed new course "Are You Thinking of Becoming an Academic?"	2018
	Team Mentor, CREATE-X Idea To Prototype team	2017
	CETL Class of 1969 Teaching Fellows program	2011–2012
	Developed new course "Information Processing Models of Neural Systems"	2009
	ECE Effective Teaching Workshop series	2008
	PAESMEM/Stanford Workshop on Mentoring in Engineering	2004

TRAINEE SUPERVISION

Postdoctoral Scholars

Nathan Cruzado	Topic: *Closed-Loop Optogenetic Stimulation*	2021–present
Sankar Alagapan	Topic: *Electrophysiological Biomarkers to Optimize Deep Brain Stimulation for Treatment Resistant Depression*	2018–2022
	Co-supervised with Robert Butera	
	Now Research Scientist II at Georgia Tech	

PhD students

Elif Ceren Fitoz	Thesis: *Electrophysiology signatures of depression recovery with DBS*	2022–present
	Co-advised with Sankar Alagapan	
	Computational Neural Engineering Training Program Scholar	
Yenho Chen	Thesis: *New Decomposed Methods for Time Series Analysis*	2021–present
	Computational Neural Engineering Training Program Scholar	
Asim Gazi	Thesis: *Quantifying Changes in Stress During Trauma Recall and Non-invasive Vagus Nerve Stimulation*	2021–2023
	Co-advised with Omer Inan	
	Schmidt Science Fellowship; NSF Graduate Fellowship	
	Now Postdoctoral Scholar at Harvard University	
Belén Martín Urcelay	Thesis: *Information Theory Approaches to Human-in-the-loop Machine Learning*	2021–present
	Co-advised with Matthieu Bloch	
	Fulbright Fellow; Rafael del Pino Scholarship	
Kion Fallah	Thesis: *Manifold Learning of Neural Representations for Efficient Machine Learning Systems*	2019–2023

	CSIP Outstanding Research Award	
	Now Senior Research Scientist, Waabi	
Kyle Johnsen	Thesis: *Building, exploiting and distributing tools for closed-loop optogenetic stimulation*	2019–present
	Computational Neural Engineering Training Program Scholar	
Stefano Fenu	Thesis: *Leveraging Low-dimensional Geometry for Search and Ranking*	2016–2023
	Co-advised with Thad Starner	
Adam Willats	Thesis: *Leveraging closed-loop control to understand neural circuits*	2016–present
	Computational Neuroscience Training Program Fellow	
Matt O'Shaughnessy	Thesis: *Structure and Causality in Understanding Complex Systems*	2016–2022
	Co-advised with Mark Davenport	
	Open Philanthropy Technology Policy Fellowship; NDSEG graduate fellowship; International Affairs Paper Competition Award (GT); Science ATL Communication Fellowship	
	Visiting Fellow at the Carnegie Endowment for International Peace	
	Now Foreign Affairs Officer, US Department of State	
Greg Canal	Thesis: *Feedback Coding for Efficient Interactive Machine Learning*	2016–2021
	Selected participant in TRIPODS Summer School, Institute for Foundations of Data Science, UW-Madison	
	Postdoctoral Scholar at University of Wisconsin, Madison	
	Now AI Research Scientist, Intelligent Systems Center, Johns Hopkins University Applied Physics Laboratory	
Marissa Connor	Thesis: *Structured Learning With Manifold Representations of Natural Data Variations*	2014–2021
	NSF graduate fellowship; Herbert P. Haley Fellowship	
	Now Machine Intelligence Engineer at Embedded Intelligence	
Ayse Cakmak	Thesis: *Disease State Prediction Using Multiscale Dynamics*	2019–2021
	Co-advised with Gari Clifford	
	Now Motion Health Algorithm Scientist at Apple, Inc.	
Nicholas Bertrand	Thesis: *Exploiting Structure in Dynamical Systems for Tracking and Dimensionality Reduction*	2013–2019
	Senior Principal Systems Engineer, Future Technical Leaders Program at Northrop Grumman	
	Now Software Engineer at Google, Inc.	
John Lee	Thesis: *Exploiting Low-dimensional Structure and Optimal Transport for Tracking and Alignment*	2015–2019
	DSO Postgraduate Scholar; CSIP Outstanding Research Award	
	Now Principal Member of Technical Staff at DSO National Laboratories of Singapore	
Abigail Kressner	Thesis: *Structure in Time-frequency Binary Masking*	2011–2015

	NSF and NDSEG graduate fellowships; Chih Foundation Research Award	
	Now Assistant Professor, Technical University of Denmark (DTU)	
	and Copenhagen University Hospital	
Adam Charles	Thesis: *Dynamics and Correlations in Sparse Signal Acquisition*	2010–2015
	ECE Outstanding GRA Award; CSIP Outstanding Research Award	
	Sigma Xi Best Dissertation Award	
	Postdoctoral Scholar at Princeton University	
	Now Assistant Professor of Biomedical Engineering at Johns	
	Hopkins University	
Mengchen Zhu	Thesis: *Sparse Coding Models of Neural Response in the Primary*	2009–2015
	Visual Cortex	
	Fellow in the Insight Data Science Fellows Program	
	Now Associate at BlackRock, Inc.,	
Aurèle Balavoine	Thesis: *Mathematical Analysis of a Dynamical System for*	2011–2014
	Sparse Recovery	
	Co-advised with Justin Romberg	
	Now Software Engineer at The MathWorks, Inc.	
Han Lun Yap	Thesis: *Constrained Measurement Systems of Low-dimensional Signals*	2009–2013
	DSO Postgraduate Scholar	
	ECE Outstanding GRA Award; CSIP Outstanding Research Award	
	Now Principal Member of Technical Staff and Lab Director (Radar Lab)	
	at DSO National Laboratories of Singapore	

MS students

Asa Harbin	Project: *Contrastive Learning for Avoiding Feature Suppression*	2022–2023
	Now researcher at MIT Lincoln Laboratory	
Arish Alreja	Project: *Volume constraints in sparse coding models*	2015–2016
	Now Ph.D. student in Neural Computation at Carnegie Mellon University	
Alex Moreno	Thesis: *Restricting Vocabulary Size in Pediatric Augmentative*	2014–2015
	and Alternative Communication	
	Co-advised with Ayanna Howard	
	Now Ph.D. student in Computer Science at Georgia Tech	
Abigail Kressner	Thesis: *Auditory Models for Evaluating Algorithms*	2010–2011
Robert Ortman	Thesis: *Sensory Input Encoding and Readout Methods for in Vitro*	2009–2012
	Living Neuronal Networks	
	Co-advised with Steve Potter	
	Now researcher at Georgia Tech Research Institute	

Selected undergraduate students

Alec Helbling	Project: *Navigating the Latent Space of Deep Generative Models*	2020–2023
	Now Ph.D. student at Georgia Institute of Technology	
Sivabalan Manivasagam	Project: *Interactive Object Segmentation using Binary Inputs*	2016–2018
	Barry M. Goldwater Scholar; NSF graduate fellow	
	Georgia Tech University Interdisciplinary Research Award	
	Now at Uber Advanced Technologies Group and Ph.D. student at the University of Toronto	
Alex Ritchie	Project: *Learning manifold transport operators on dynamic data*	2015–2016
	Now Ph.D. student in Electrical & Computer Engineering at the University of Michigan	
Saurabh Kumar	Project: *Manifold learning as a visual model*	2015
	Knight-Hennessy Scholar (Stanford University)	
	Barry M. Goldwater Scholar; AI Resident at Google Brain Montreal	
	Now Ph.D. student in Computer Science at Stanford University	
Allison Del Giorno	Thesis: *A Sparse Coding Model of V1 Produces Surround Suppression Effects in Response to Natural Scenes*	2012–2013
	Barry M. Goldwater Scholar; NSF and NDSEG graduate fellow	
	Ph.D. in Robotics at Carnegie Mellon University (2022)	
	Now Research Software Engineer at Microsoft Research	

UNIVERSITY SERVICE

Executive Committee, Neuro Next Initiative	2023–present
Member, EBB2/3 economic impact task force	2023–present
Member, Selection committee for Frontiers in Biosciences and Bioengineering Family Awards	2022
Member, EBB2/3 research neighborhood taskforce	2022
Co-Chair, Strategic Planning Committee for GTNeuro	2021–2023
Co-Founder, Growing Up In Science Conversation Series (GT)	2021–2022
Elected Representative, ECE Statutory Advisory Committee	2020–present
Member, ECE Faculty Recruitment Committee	2013–2018, 2020–present
Leadership team, Development of Georgia Tech seed grant program	2019–2020
Mentor, School of ECE Junior Faculty Mentoring Program	2019–2020
Mentor, BME Department Junior Faculty Mentoring Program	2019–present
Member, College of Engineering committee on Reappointment, Promotion and Tenure	2018–2020
Co-Director, Georgia Tech Neural Engineering Center	2018
Planning team, Development of Ph.D. program in neuroscience & neurotechnology	2018
Faculty Guide, Exploration of Social Justice in South Africa, Stamps President's Scholars	2017
Associate Director, Georgia Tech Neural Engineering Center	2016–2017
Member, Center for Machine Learning at Georgia Tech (ML@GT)	2016–present

Member, Institute for Robotics & Intelligent Machines (IRIM)	2016–present
Member, Institute for Data Engineering and Science (IDEaS)	2016–present
Member, Neuro@GT Steering Committee	2016–2022
Steering Committee, Emory/GT Kavli Brain Forum	2016–2019
Co-Chair, ECE Strategic Planning & Strategic Doing Committee	2016–2017
Faculty Guide, 2014 Class of Stamps President's Scholars	2014–2018
Executive Committee Member, Georgia Tech Neural Engineering Center	2014–2016
Member, Faculty Council on Data Science and Engineering	2014–2016
Member, BME Faculty Recruitment Committee (Neuroengineering)	2014–2015
Member, Neuro@GT Task Force	2014
Panelist, NSF CAREER Award Proposal Workshop (GT OSP)	2014
Member, Mark and Linda Smith Chair Search Committee (ECE)	2013–2015
Member, Parker H. Petit Institute for Bioengineering and Bioscience (IBB)	2013–present
Member, Center for Signal and Information Processing	2012–present
Faculty Associate, Grand Challenges Living Learning Community	2012–2015
Program Faculty, Interdisciplinary Bioengineering Graduate Program	2009–present
Member, ECE School Chair Search Committee	2011–2012
Admissions Panel, Georgia Tech President's Scholarship Program	2012–2013
Member, Task Force on Family Friendly Policies	2012
Member, ECE Graduate Student Recruitment Committee	2011–2012
Member, Laboratory for Neuroengineering	2008–2012
Member, ECE Student-Faculty Committee	2008–2011
Member, ECE Student Award Selection Committee	2009–2011
Panelist, ECE Academic Careers CV Workshop	2008, 2010
Member, ECE Research Promotion Committee	2009
Panelist, ECE Academic Careers Seminar Series	2008, 2009
University Associate, Martel College (Rice University)	2004–2007
Member, University Council (Presidential advisory committee, Rice University)	2004–2006
Panelist, workshop for new teaching assistants (Rice University, School of Engineering)	2003, 2004
Member, ECE Graduate Student Council (Rice University)	2002–2003
Member, ECE Graduate Committee (Rice University)	2002–2003

OUTSIDE SERVICE AND OTHER ACTIVITIES

Presenter, Gwinnett School of Mathematics, Science and Technology Speaker Series	2019
Organizer and Speaker, Atlanta Science Festival community outreach event on *Neuro-Engineering: Blurring the Lines Between Mind and Machine*	2019
Sponsorship from Georgia Tech (College of Engineering, Depts. of ECE/BME) and IEEE Brain	
Selected participant, Science Communication Bootcamp, Alan Alda Center for Communicating	2018

Science, Stony Brook University

Invited participant, The Brain and Computation research program, Simons Institute for the   2018
     Theory of Computing, University of California, Berkeley

Faculty host, Georgia Intern Fellowship for Teachers (GIFT) program, Center for Education   2018
     Integrating Science, Mathematics, and Computing (CEISMC), Georgia Tech

Mentor, CyberLaunch   2015–present

Selected Participant, Kauffman FastTrac TechVenture course, Emory University   2015

Mentor, NeuroLaunch   2014–present

Technical Consultant, Qualcomm, Inc.   2013

Presenter, K-12 outreach (science/engineering demonstrations and tutoring)   1996–2011

Panelist, BRAIN program panel on neuroscience careers (Center for Behavioral Neuroscience)   2009

Judge, Science and Engineering Fair of Houston   2004

Technical Consultant, AdaptedWave Technologies, Inc.   2000

Project Chair, Tau Beta Pi elementary science demonstrations, (University of Michigan)   1998

Tutor, Reach Out! (University of Michigan educational outreach center)   1996–1998

Scientific Communities and Access

Neuromatch (2020): *Nature.com, Simonsfoundation.org, Genetic Engineering & Biotechnology News*

Rejecta Mathematica (2009): *Science, The Economist, Nature.com, USA Today, Chronicle of Higher Education, AMS Math in the Media, Ars Technica, MathDL, Rice News, Seed Magazine, Slashdot*

PATENTS

1. A. Helbling, K. Fallah, M. O'Shaughnessy, and C. Rozell. User preference guided content generation from paired comparisons, filed March 31, 2023. Provisional patent application number 63/493,642.

2. M. O'Shaughnessy, G. Canal, M. Connor, M. Davenport, and C.J. Rozell. Methods for generating and providing causal explanations of artificial intelligence models and devices thereof, filed December 20, 2022. Patent application number 18/011,629.

3. S. Alagapan, R. Butera, K Choi, A. Crowell, B. Mahmoudi, H. Mayberg, P. Riva-Posse, C. Rozell, M. Sendi, V. Tiruvadi, A. Veerakumar, and A. Waters. System to identify transitions in brain states from electrophysiological markers in DBS for depression, filed August 3, 2021. Provisional patent application.

4. J. Lee and C.J. Rozell. Systems and methods for cell membrane identification and tracking, and technique automation using the same, issued November 30, 2021. U.S. patent number 11,188,737.

5. J. Zia, O. Inan, J. Kimball, and C.J. Rozell. Systems and methods for automated localization of wearable cardiac monitoring systems and sensor position-independent hemodynamic inference, filed February 26, 2021. Patent application number 17/187,585.

6. G. Clifford, A. Cakmak, C.J. Rozell, and A. Willats. Systems and methods for detecting sleep activity, filed September 4, 2020. Patent application number 17/640,405.

7. G. Canal, C.J. Rozell, S. Fenu, M. Davenport, and A. Massimino. Systems and methods for preference and similarity learning, filed February 3, 2020. Patent application number PCT/US2020/016379.

8. N.J. Halas, D.H. Johnson, S.W. Bishnoi, C.S. Levin, C.J. Rozell, and B.R. Johnson. All-optical nanoscale sensor, issued October 25, 2011. U.S. patent number 8,045,152.

9. C.J. Rozell, D.H. Johnson, R.B. Baraniuk, B.A. Olshausen, and R.L. Ortman. Neural circuit for computing sparse codes, issued August 24, 2010. U.S. patent number 7,783,459.

BOOK CHAPTERS

1. D.H. Johnson, I.N. Goodman, and C.J. Rozell. Information theory and systems neuroscience. In S. Grün and S. Rotter, editors, *Analysis of parallel spike trains.* Springer-Verlag, 2010.

JOURNAL PUBLICATIONS

1. S. Alagapan, S. Heisig, K Choi, P. Riva-Posse, A. Crowell, V. Tiruvadi, M. Obatusin, A. Veerakumar, A. Waters, R. Gross, S. Quinn, L. Denison, M. O'Shaughnessy, M. Connor, G. Canal, J. Cha, R. Hershenberg, T. Nauvel, F. Isbaine, M. Afzal, M. Figee, B. Kopell, R. Butera, H. Mayberg, and C. Rozell. Cingulate dynamics track depression recovery with deep brain stimulation. *Nature*, September 2023. Advanced Online Publication.

2. A. Seas, M.S. Noor, K.S. Choi, A. Veerakumar, M. Obatusin, J. Dahill-Fuchel, V. Tiruvadi, E. Xu, P. Riva-Posse, C.J. Rozell, H.S. Mayberg, C.C. McIntyre, A.C. Waters, and B. Howell. Subcallosal cingulate deep brain stimulation evokes two distinct cortical responses via differential white matter activation. August 2023. Under review.

3. M. O'Shaughnessy, M. Davenport, and C. Rozell. Distance preservation in state-space methods for detecting causal interactions in dynamical systems. August 2023. Under review.

CONFERENCE ABSTRACTS

1. E. Yezerets, N. Mudrik, Y. Chen, A. Charles, and C. Rozell. Decomposed linear dynamical systems for c. elegans functional connectivity. In *Society for Neuroscience, Nanosymposium on Prefrontal Mechanisms of Executive Function III*, Washington, D.C., November 2023.

2. A. H. Gazi, D Bremner, J. Hahn, C. J. Rozell, and O. T. Inan. Characterizing the stress-reducing effects of non-invasive vagus nerve stimulation. In *IEEE-EMBS International Conference on Biomedical and Health Informatics (BHI'23)*, Pittsburgh, PA, October 2023. Special session on Enabling Closed-Loop Technologies for Mental Health: Biobehavioral Sensor Informatics and Just-in-Time Interventions.

3. E. Yezerets, N. Mudrik, Y. Chen, C. Rozell, and A. Charles. Decomposed linear dynamical systems for c. elegans functional connectivity. In *Computational and Systems Neuroscience (COSYNE) Meeting*, Montreal, Quebec, Canada, March 2023.

4. S. Alagapan, S. Heisig, K.S. Choi, A. Waters, A. Veerakumar, V. Tiruvadi, M Obatusin, T.J. Nauvel, J. Cha, M. Figee, A.L. Crowell, P. Riva-Posse, R.J. Butera, H.S. Mayberg, and C.J. Rozell. A novel subcallosal cingulate biomarker of deep brain stimulation mediated stable recovery. In *Society for Neuroscience (SfN) Annual Meeting*, San Diego, CA, November 2022.

5. N. Mudrik, Y. Chen, E. Yezerts, C.J. Rozell, and A. Charles. Decomposed linear dynamical systems (dlds) for learning the latent components of neural dynamics. In *Women in Machine Learning (WiML) Workshop*, November 2022. New Orleans, LA.

6. K. Johnsen, N. Cruzado, A. Willats, and C.J. Rozell. Bridging model and experiment with cleosim: a testbed for in-silico prototyping of complex neuroscience experiments. In *Society for Neuroscience (SfN) Annual Meeting*, San Diego, CA, November 2022.

7. A. Willats, M.F. Bolus, K. Johnsen, G.B. Stanley, and C.J. Rozell. Cloctools: A library of tools for closed-loop neuroscience. In *Society for Neuroscience (SfN) Annual Meeting*, San Diego, CA, November 2022.

8. S. Alagapan, S. Heisig, K.S. Choi, A. Waters, A. Veerakumar, V. Tiruvadi, M Obatusin, T.J. Nauvel, J. Cha, M. Figee, A.L. Crowell, P. Riva-Posse, R.J. Butera, H.S. Mayberg, and C.J. Rozell. A novel

subcallosal cingulate biomarker of deep brain stimulation mediated stable recovery. In *Collaborative Research in Computational Neuroscience (CRCNS) Annual PI Meeting*, Atlanta, GA, October 2022.

9. E.C. Fitoz, S. Alagapan, S. Heisig, K.S. Choi, A. Waters, A. Veerakumar, V. Tiruvadi, M Obatusin, T.J. Nauvel, J. Cha, M. Figee, A.L. Crowell, P. Riva-Posse, R.J. Butera, H.S. Mayberg, and C.J. Rozell. Exploration of acute effects of stimulation frequency on subcallosal cingulate dynamics in scc dbs. In *Collaborative Research in Computational Neuroscience (CRCNS) Annual PI Meeting*, Atlanta, GA, October 2022.

10. A. H. Gazi, S. An, S. Natarajan, J. A. Sanchez-Perez, D Bremner, J. Hahn, O. T. Inan, and C. J. Rozell. Latent state-space modeling of physiological responses to non-invasive vagus nerve stimulation and traumatic stress. In *Collaborative Research in Computational Neuroscience (CRCNS) Annual PI Meeting*, Atlanta, GA, October 2022.

11. K. Johnsen, N. Cruzado, A. Willats, and C.J. Rozell. Cleo: a simulation testbed for bridging model and experiment in mesoscale neuroscience. In *Collaborative Research in Computational Neuroscience (CRCNS) Annual PI Meeting*, Atlanta, GA, October 2022.

12. A. Willats, M.F. Bolus, K. Johnsen, N. Cruzado, G.B. Stanley, and C.J. Rozell. Cloctools: A library of tools for closed-loop neuroscience. In *Collaborative Research in Computational Neuroscience (CRCNS) Annual PI Meeting*, Atlanta, GA, October 2022.

13. N. Mudrik, Y. Chen, E. Yezerts, C.J. Rozell, and A. Charles. Decomposed linear dynamical systems (dlds) for learning the latent components of neural dynamics. In *Neuromatch Conference (NMC) 2022*, September 2022. Virtual meeting.

14. A. H. Gazi, S. An, S. Natarajan, J. A. Sanchez-Perez, D Bremner, J. Hahn, C. J. Rozell, and O. T. Inan. Latent state-space modeling of physiological responses to non-invasive vagus nerve stimulation and traumatic stress. In *IEEE-EMBS International Conference on Biomedical and Health Informatics (BHI)*, Ioannina, Greece, September 2022.

15. C.J. Rozell. Informing clinical decisions in psychiatric neuromodulation with ai. In *DBS Think Tank X*, August 2022. Orlando, FL and virtual meeting.

16. S. Alagapan, A. Aloysi, R. Butera, J. Cha, K. Choi, A. Crowell, M. Figee, R. Gross, S. Heisig, B. Kopell, H. Mayberg, T. Nauvel, M. Obatusin, S. O'Neill, P. Riva Posse, C. Rozell, A. Smith, and A. Waters. Electrophysiological biomarkers to optimize DBS for depression V. In *The BRAIN Initiative Investigators Meeting*, June 2022.

KEYNOTE LECTURES

1. Leveraging low-dimensional models for human-in-the-loop machine learning tasks. International Traveling Workshop on Interactions between low-complexity data models and Sensing Techniques (iTWIST), December 2020. Virtual meeting (originally Nantes, France).

2. Neuroengineering and AI: Opportunities and challenges in a future blurring the lines between mind and machine. Stony Brook Young Investigators Review Colloquium, Alan Alda Center for Communicating Science, Stony Brook University, April 2019. Stony Brook, NY.

3. Closing the loop between mind and machine: Building algorithms to interface with brains at multiple scales. Data Science Research Forum, Michigan Institute for Data Science (MIDAS), University of Michigan, December 2017. Ann Arbor, MI.

INVITED LECTURES

1. Understanding depression recovery with deep brain stimulation using explainable AI. Huntsman Mental Health Institute Seminar, University of Utah, March 2023. Salt Lake City, UT.

2. Peeking inside black boxes: Understanding depression recovery with deep brain stimulation using explainable AI. Department of Psychiatry Seminar, University of Cambridge, December 2022. Cambridge, UK (virtual).

3. Peeking inside black boxes: Understanding depression recovery with deep brain stimulation using explainable AI. Engineering Research Seminar Series, Kennesaw State University, September 2022. Marietta, GA.

4. Peeking inside black boxes: Understanding depression recovery with deep brain stimulation using explainable AI. ECE Seminar, University of Michigan, April 2022. Ann Arbor, MI.

5. Peeking inside black boxes: Understanding depression recovery with deep brain stimulation using explainable AI. College of Medicine Semianr, University of Florida, March 2022. Gainesville, FL.

6. Peeking inside black boxes: Understanding depression recovery with deep brain stimulation using explainable AI. GTNeuro Seminar Series, Georgia Institute of Technology, February 2022. Atlanta, GA.

7. Leveraging low-dimensional models for extracting tacit knowledge from humans and machines. Cognition and Brain Sciences and Cognitive Aging Brown Bag Seminar, School of Psychology, Georgia Institute of Technology, March 2021. Atlanta, GA.

8. Computational neuroengineering: Building the algorithmic foundations for interacting with neural circuits. Neuroscience seminar, Cold Spring Harbor Laboratory, October 2019. Cold Spring Harbor, NY.

9. Exploiting the low-dimensional geometry of dynamic natural scenes for efficient coding in sensory systems. MSRI Aspen Computational Neuroscience Meeting: Neural Theories of Cognition, October 2019. Aspen, CO.

10. Advances in online state estimation at the intersection of dynamical systems and dimensionality reduction for computational neuroengineering. Electrical and Computer Engineering Seminar, Rice University, June 2019. Houston, TX.

11. Computational neuroengineering: Building the algorithmic foundations for interacting with neural systems across multiple scales. Institute for Advanced Computational Science Seminar, Stony Brook University, April 2019. Stony Brook, NY.

12. Dynamical systems and dimensionality reduction in computational neuroengineering. Electrical Engineering Seminar Series, Harvard University, March 2019. Cambridge, MA.

13. Computational neuroengineering: Building the algorithmic foundations for interacting with neural systems across multiple scales. Joint Biomedical Engineering and Electrical & Computer Engineering Departmental Seminar, Boston University, February 2019. Boston, MA.

14. Computational neuroengineering: Building the algorithmic foundations for interacting with neural systems across multiple scales. Preston M. Green Electrical & Systems Engineering Seminar, Washington University in St. Louis, January 2019. St. Louis, MO.

15. Geometry-preserving embeddings for understanding dynamical systems: Recurrent networks and delay embeddings. Nonlinear Science & Mathematical Physics Seminar, School of Physics, Georgia Institute of Technology, May 2018. Atlanta, GA.

16. Closed-loop optogenetic control in vivo: tracking states. Computational and Systems Neuroscience (COSYNE) Workshop on Closed-loop control of neural systems and circuits for scientific discovery, March 2018. Breckenridge, CO.

17. Closing the loop between mind and machine: Building algorithms to interface with brains at multiple scales. SINE Center for Research in Signals and Networks, Colorado School of Mines, March 2018. Golden, CO.

18. Efficient coding theories for neural systems under biophysical constraints. Vision seminar, Penn Vision Research Center, University of Pennsylvania, March 2018. Philadelphia, PA.

19. Exploiting time-varying low-dimensional signal structure. Redwood Center for Theoretical Neuroscience, University of California, Berkeley, February 2018. Berkeley, CA.

20. Building the algorithmic foundations for interfacing, understanding and exploiting neural systems. Kavli Institute of Theoretical Physics program on Physics of Hearing: From Neurobiology to Information Theory and Back, July 2017. Santa Barbara, CA.

21. Dimensionality reduction as a model of efficient coding in sensory systems. Kavli Institute of Theoretical Physics program on Physics of Hearing: From Neurobiology to Information Theory and Back, July 2017. Santa Barbara, CA.

22. Optimal sensory coding theories for neural systems under biophysical constraints. Theoretical Neuroscience Day, Algorithms and Randomness Center and GT Neural Engineering Center, Georgia Institute of Technology, March 2017. Atlanta, GA.

23. Efficient coding with biophysical constraints can explain properties of networks and neural responses. In *Computational and Systems Neuroscience (COSYNE) Workshop on New Methods for Understanding Neural Dynamics and Computation*, Salt Lake City, UT, February 2017.

24. Open- and closed-loop optogenetic stimulation for injecting sensory information in vivo. Bernstein Sparks Workshop: Naturalistic integration of information from external stimulation into the ongoing neuronal activities of the brain, Hanse-Wissenschaftskolleg Institute for Advanced Study, October 2016. Delmenhorst, Germany.

25. Building models of sensory neural coding and developing tools to test them. Institute for Neuroscience Seminar Series, University of Texas-Austin, September 2016. Austin, TX.

26. Moving toward in vivo closed-loop optogenetic control of neural activity. In *American Control Conference (ACC) Workshop on Modeling, Estimation and Control Across Scales in Neuroscience*, Boston, MA, July 2016.

27. Exploiting low-dimensional geometric structure in high-dimensional data: lessons from neuroscience for machine learning. Center for Nonlinear Studies Seminar, Los Alamos National Laboratory, June 2016. Santa Fe, NM.

28. Exploiting the low-dimensional structure of dynamical system attractors. In *Computational and Systems Neuroscience (COSYNE) Workshop on Dimensionality reduction for the analysis and interpretation of high-dimensional neural datasets*, Salt Lake City, UT, February 2016.

29. The big (BRAIN) data cometh: Low-dimensional models for understanding neural systems. Joint Biomedical Engineering and Center for Systems Neuroscience Seminar, Boston University, January 2016. Boston, MA.

30. The big (BRAIN) data cometh: Low-dimensional models for understanding neural systems. Systems, Information, Learning and Optimization (SILO) seminar, Wisconsin Institute for Discovery, University of Wisconsin, November 2015. Madison, WI.

31. Dimensionality reduction as a model of efficient coding in the visual pathway. Neuroscience Workshop on Dimensionality Reduction Methods, Center for Mind, Brain, and Culture, Emory University, October 2015. Atlanta, GA.

32. Optimal sensory coding theories for neural systems under biophysical constraints. *Conference on Sensing, information and decision at the cellular level*, Abdus Salam International Center for Theoretical Physics (ICTP), July 2015. Triste, Italy.

33. Dynamical systems and low-dimensional signal models. ECE Department seminar, Carnegie Mellon University, March 2015. Pittsburgh, PA.

34. Optimal sensory coding under constraints. Biomedical Engineering Department seminar, Johns Hopkins University, March 2015. Baltimore, MD.

35. Dimensionality reduction with constrained randomized operators. CDA/Skytree Machine Learning seminar series, April 2014. Atlanta, GA.

36. Signal processing for computational neuroscience. IEEE Atlanta Chapter Signal Processing Society lecture, April 2014. Atlanta, GA.

37. Exploring optimal sensory coding theories for neural systems under biophysical constraints. ECE Department seminar, Rice University, March 2014. Houston, TX.

38. Exploring optimal sensory coding theories under biophysical constraints. Computational Neuroscience seminar, University of Texas-Austin, March 2014. Austin, TX.

39. On the move: Dynamical systems for modeling, measurement and inference in sparse signal models. Institute for Computational Engineering and Sciences seminar, University of Texas-Austin, March 2014. Austin, TX.

40. Exploring optimal sensory coding theories under biophysical constraints. Computational Neuroscience Reading Group seminar, University of Michigan, February 2014. Ann Arbor, MI.

41. On the move: Dynamical systems for modeling, measurement and inference in sparse signal models. Communications and Signal Processing seminar, EECS Department, University of Michigan, February 2014. Ann Arbor, MI.

42. On the move: Dynamical systems for modeling, measurement and inference in compressed sensing. In *Matheon Workshop on Compressed Sensing and its Applications*, Berlin, Germany, December 2013.

43. How can efficient neural coding be exploited for neural interfacing? Brain Workshop: Enabling Health through Neurotechnologies, October 2013. Atlanta, GA.

44. Tracking time-varying sparse signals. In *Advanced Modem Technology Forum, Qualcomm Technologies, Inc.*, San Diego, CA, May 2013.

45. Sparse coding in brains and machines: exploiting insight from neuroscience to improve data analysis with sparsity models. Research Seminar, Qualcomm Technologies, Inc., April 2013. San Diego, CA.

46. Dynamical systems for modeling, measurement and inference with sparse signals. *Electrical and Computer Engineering Seminar*, Duke University, October 2012. Durham, NC.

47. Recursive estimation of dynamic signals with sparsity models via re-weighted l1 minimization. In *Janelia Farm Conference on Machine Learning, Statistical Inference, and Neuroscience*, Ashburn, VA, May 2012.

48. Spectral super-resolution of hyperspectral images. In *SIAM Conference on Imaging Science*, Philadelphia, PA, May 2012.

49. Sparse coding networks and compressed sensing in neural systems. *INC Chalk Talk Series*, Institute for Neural Computation, University of California at San Diego, October 2011. La Jolla, CA.

50. Sparsity models for hyperspectral imaging and compressive sensing LIDAR. *CIS Seminar Series*, Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology, October 2011. Rochester, NY.

51. Sparsity models and constrained systems: What does neuroscience have to do with compressed sensing? *Communications Seminar*, Coordinated Science Laboratory, University of Illinois at Urbana-Champaign, April 2011. Urbana, IL.

52. Compressed sensing design of LIDAR sensors. United States Geospatial Intelligence Foundation GEOINT Symposium, November 2010. New Orleans, LA.

53. Compressed sensing design of LIDAR sensors. NGA Compressive Sensing Workshop, June 2010. McLean, VA.

54. Network models of sparse coding and nonclassical receptive field effects. NSF Workshop on Hybrid Neuro-Computer Vision Systems, April 2010. New York, NY.

55. Sparse representation for image analysis and understanding. Day-long short course attended by representatives from several government agencies, January 2009. Washington, D.C.

56. Low-dimensional models in computational neuroscience and signal processing. *Center for Signal and Image Processing Seminar*, ECE Department, Georgia Institute of Technology, October 2008. Atlanta, GA.

57. Analog and digital sparse approximation with applications to compressed sensing. In *2008 SIAM Conference on Imaging Science*, San Diego, CA, July 2008. Invited talk.

58. Neural architectures for sparse approximation. *Networking, Communications, and DSP Seminar*, EECS Department, UC Berkeley, April 2008. Berkeley, CA.

59. Neural architectures for sparse approximation. In *Information Theory and Applications Workshop*, La Jolla, CA, January 2008. Invited talk.

60. When bits meet brains: Locally competitive algorithms for sparse approximation. *Electrical and Computer Engineering Seminar*, McGill University, May 2007. Montreal, Canada.

61. When bits meet brains: Locally competitive algorithms for sparse approximation. *Electrical and Computer Engineering Seminar*, Georgia Institute of Technology, May 2007. Atlanta, GA.

62. Neurally plausible sparse coding via locally competitive algorithms. *Center for the Neural Basis of Cognition Seminar*, Carnegie Mellon University, April 2007. Pittsburgh, PA.

63. When bits meet brains: Locally competitive algorithms for sparse approximation. *Electrical Engineering Seminar*, UCLA, March 2007. Los Angeles, CA.

64. Signal processing and electronic music. *IEEE Student Chapter Undergraduate Lecture Series*, Rice University, January 2006. Houston, TX.

65. Measuring information consequences of signal processing. *Research Seminar*, Dolby Laboratories, June 2004. San Francisco, CA.
